Defendants,)	LITHIUM NEVADA CORP'S SUR-
)	REPLY IN OPPOSITION TO MOTION
)	FOR PRELIMINARY INJUNCTION
and)	
LITHIUM NEVADA CORP.,)	
)	
Defendant-Intervenor.)	

I, Jennifer Schonlau, declare as follows:

1. I am over eighteen years old, have personal knowledge of the matters set forth in this Declaration, and am competent to testify as to the matters set forth herein.

2. I am the Environmental Engineer of Lithium Nevada Corp. ("Lithium Nevada"). I am a licensed professional engineer and my work at Lithium Nevada focuses on environmental compliance and permitting.

3. When the Reno-Sparks Indian Colony ("RSIC") raised arguments concerning (1) evidence of an Indian Camp and human remains in an 1868 Field Survey (ECF 73-1); and (2) other projects for which the BLM Winnemucca District Office sent the RSIC's Cultural Resources Manager and Tribal Historic Officer notices (ECF 73-2 at ¶ 18), I completed desktop research to map the 1868 Indian Camp relative to the Thacker Pass Project facilities and the other project locations within the Winnemucca District area in relation to the RSIC's identified area of cultural interest as well as Lithium Nevada's Thacker Pass Project.

4. The first step in the process was to find publicly available information concerning the locations of the Indian Camps described in the 1868 Field Survey. I used the link provided in RSIC's brief (ECF 73 at 6) to search BLM's Land Records related to Township 44 North, Range 36 East (<https://www.nv.blm.gov/LandRecords/find.php?town=0440N&range=0360E>). There, along with the handwritten notes that the RSIC provided to the Court, I also found an 1868 map, which I have attached here as **Attachment A**, using the link at the top of the search results, indicated by the red arrow in the website screen shot:

1
2
3 5. The 1868 map identifies two areas with “Remains of Indian Lodgings.” See
4 Attachment A.

5 6. In the process of reviewing BLM’s Land Records for the 1868 map, I also ran
6 searches for documents related to Township 44N, Range 34 East and Township 44N, Range 35
7 East – areas also covered by the Thacker Pass Project. This was done using the same website link
8 RSIC provided by simply changing the range number in the search fields at the top of the page.
9 The search results provided additional links to different documents. See attached search results,
10 **Attachments B and C**. The process of viewing the search results is not easy. One must click on
11 each numbered link in the chart to open an individual document. Navigating each document is
12 equally difficult. One must use a drop-down menu to click on each page number to “jump to” the
13 next page. As there were hundreds of links in the search results for the three Township/Range
14 combinations, it would have taken many hours to view each document and page.

15 7. Using the 1868 map, I mapped the 1868 map’s “Remains of Indian Lodgings” in
16 relation to the Thacker Pass Project. To make this map I saved the 1868 map as a .tiff file, which
17 is compatible with ArcMap. I uploaded the 1868 .tiff into Arcmap. Next I used the Public Land
18 Survey System (PLSS) shape file as a background to reference the 1868 map. I zoomed in on the
19 desired area (in this case, the desired area was section 22 of Township 44 North Range 36 E).
20 Using the georeferenced tool bar, I chose the option “fit to display” to fit the 1868 map into the
21 correct location on ArcMap. Next, I added ground control points to the 1868 map. I used the edges
22 of section 22 of Township 44 N Range 36 E from the PLSS shape file as ground control points.
23 Once the 1868 map was properly georeferenced, I added the Indian Lodging Remnant Information.
24 I matched the Indian lodging on the paper map and added points on the digital map to mirror the
25 paper map. I then included on the map the location of the Thacker Pass Project facilities, existing
26 roads, existing transmission lines, and the land status to show BLM land and private property.
27 When making this map, I noticed the Indian Lodging appeared to be on private property based on
28

information from the Land Status shapefile. To double check this, I loaded the Humboldt County Nevada Parcel information shape file into ArcMap. The Humboldt County Nevada Parcel information shape file showed the Indian Lodges located on private property, parcel number 03032109. The resulting map is **Attachment D**.

8. We undertook a separate mapping exercise to evaluate RSIC's claims about the projects within the Winnemucca District for which RSIC asserts having received notice from the BLM. We first identified the locations of each, specific project listed in ECF 73-2 at ¶ 18.¹ For this, we relied on BLM's website and e-planning web pages for the projects, most of which include maps:

Baltazor Geothermal Development Project	https://eplanning.blm.gov/eplanning-ui/project/2000508/510
Calico Complex	https://eplanning.blm.gov/eplanning-ui/project/2010516/510
Pueblo Fire House	https://eplanning.blm.gov/eplanning-ui/project/2011153/510
North Valley Geothermal Development Project at San Emidio Geothermal Field	https://eplanning.blm.gov/eplanning-ui/project/1503204/510
Ormat Technologies Gerlach Area Geothermal Project	https://www.blm.gov/press-release/bureau-land-management-accepting-pre-scoping-comments-geothermal-project-near-gerlach ²

9. I then mapped each project in relation to the RSIC area of interest and also identified the Thacker Pass Project. To make this map I used a PDF map of the Reno-Spark Indian Colony Areas of Cultural Interest and converted the PDF into a .tiff, so it was compatible with ArcMap. I uploaded the .tiff into ArcMap and, in a similar fashion to the 1868 map, used the georeferencing tool bar to re-create the Reno-Sparks Indian Colony Area of Interest on the map.

¹ We disregarded the notice of staff changes at the BLM office and the EA concerning unidentified waters because neither appear to relate to a specific location.

² While there does not appear to be an e-planning page with a map, the BLM's website indicates: "The power plants, substation, pipelines, wells, and access roads proposed will be located less than 1 mile north of Gerlach, Nevada in Washoe County."

HOLLAND & HART LLP
5441 KIETZKE LANE, SUITE 200
RENO, NV 89511-2094

Here I used a base map showing satellite imagery and a shape file of Nevada Roads as ground control points to accurately reference the paper map into ArcMap.

10. Next I used descriptions of the locations of the five projects listed on the BLM website to help locate the points on the map for each project. A map of the Baltazor Geothermal Development Project showed that the Project was located in Townships 46 and 47 North and Ranges 28 and 29 East (link to map: https://eplanning.blm.gov/public_projects/2000508/200378654/20020984/250027188/Baltazor10Ok.pdf). The approximate middle of the project is located in 11 of T 46 North Range 36 East, just north of Continental Lake. I found this location in ArcMap and placed a point on the map to represent the location of the Baltazor Geothermal Development Project. Next I found a description of the Calico Complex (link to Calico Complex Description https://eplanning.blm.gov/public_projects/2010516/200473329/20043213/250049404/Calico%20WHB%20Gather%20Decision%20Record.pdf). This is a large Project, that encompasses a gather area of 1,041,000 acres and five herd management areas (HMAs) (The Black Rock Range, Calico Mountains, Granite Range, McGee Mountain, and Warm Springs Canyon HMAs). I loaded the HMA shape file onto ArcMap to locate the HMAs. All five HMAs are located within the Reno-Sparks Indian Colony Area of Interest. The Calico Complex HMA was located in the approximate center of the five HMA's so I placed a point in the center of the Calico Mountain HMA to represent the location of the Calico Complex. The Pueblo Fire House Project was a five acre project located off Highway 140 and Big Creek Road (link to location of project <https://www.blm.gov/press-release/winnemucca-district-office-seeks-public-comment-preliminary-environmental-assessment>). I found the intersection of Highway 140 and Big Creek Road in ArcMap and placed a point at the intersection to represent the location of the Pueblo Fire House Project. The North Valley Geothermal Development Project was described to be in all or portions of Sections 19-22 and 27-34 of Township 30 North Range 23 East, Sections 3-10, 15-22, and 27-34 of Township 29 North Range 23 East (link to North Valley Geothermal Development Project location description https://eplanning.blm.gov/public_projects/1503204/200352910/20039905/250046100/Decision%20Record.pdf).

1 [20Record.pdf](#)) . I placed a point where Sections 8, 9, 17, and 16 of Township 29 Range 23 meet
2 to represent the North Valley Geothermal Development Project. This is approximately the center
3 of the project area. The Ormat Technologies Gerlach Area Geothermal Development Project
4 described major facilities including power plants, substation, pipelines, wells, and access roads
5 located less than 1 mile north of Gerlach, Nevada (link to Ormat Technologies Gerlach Area
6 location description [https://www.blm.gov/press-release/bureau-land-management-accepting-pre-](https://www.blm.gov/press-release/bureau-land-management-accepting-pre-scoping-comments-geothermal-project-near-gerlach)
7 [scoping-comments-geothermal-project-near-gerlach](https://www.blm.gov/press-release/bureau-land-management-accepting-pre-scoping-comments-geothermal-project-near-gerlach)). I found the town of Gerlach on ArcMap,
8 and placed a point on the map just north of Gerlach to represent the location of the Ormat
9 Technologies Gerlach Area Project.

10 11. I then overlaid RSIC's identified "Area of Cultural Interest" to determine whether
11 the noticed projects fall within that area, which they did. I confirmed that Thacker Pass is not
12 within the "Area of Cultural Interest" identified by the RSIC and shared with the BLM. The
13 resulting map is attached as **Attachment E**.

14 12. I also took the information available from the Historic Properties Treatment Plan
15 to identify on the map the areas relevant to the Thacker Pass Project that had been subjected to
16 Class III Surveys for cultural resources. That area also is reflected on the map that is
17 **Attachment D**.

18
19 I declare under penalty of perjury under the laws of the United States of America that the
20 foregoing is true and correct.

21 Executed on August 26, 2021 in Reno, Nevada.
